## ASPECT4 Logistics release Y23Q3

The main new feature in this release is the first part of our solution to help our customers to world of ....

We start by focusing on the requirements in The Packaging and Packaging Waste Directive that is designed to prevent production of packaging waste and promote reuse of packaging and recycling and other forms of recovering packaging waste.

The solution is designed to describe and calculate the usage of packaging materials. Materials used for the primary, secondary and tertiary packaging can be defined. For produced items this can be done simple marking packaging materials with their packaging level and which material they are made of.

The screenshot shows a web interface for configuring packaging. It has four sections: 'PACKAGING LEVEL' with a dropdown set to 'P' (Primary packaging); 'PACKAGING TYPE' with a dropdown set to 'PK' (Plastic) and a search icon; 'RECYCLED' with a numeric input set to '0,00' and a '%' symbol; and 'REUSABLE' with a toggle switch set to 'No'.

PACKAGING LEVEL  
P Primary packaging

PACKAGING TYPE  
PK Plastic

RECYCLED  
0,00 %

REUSABLE  
No

Release  
**Y23Q3**

For trade items or the part of packaging materials from a produced item that are not described in the items production model, we introduce a new concept: Packaging item sets. It is possible to attach a packaging item to sales item.

These new elements makes it possible to start creating the required master data.

In the coming release we will introduce calculation, analyzing and reporting tools to help calculate EPR-fees, Plastic Taxes etc based on the new master data. These tools will also help in providing valuable insight into responsible design and production, optimizing the selection of packaging materials etc.

For further details please see the release notes for ASPECT4 Logistics Y23Q3 or contact your ASPECT4 Consultant.

Other new features in this release includes

- Production picking list using DocManager
- Improved VAT-reconciliation
- Date controlled utilization rates
- Register delivery note number by Goods receipts

EG leverer branchesoftware, der hjælper vores kunder med at udvikle deres virksomhed yderligere. Vores software er forankret i højt specialiseret viden og er udviklet på baggrund af en dyb forståelse af vores kunders profession og branche. Læs mere på <https://eg.dk/om-eg/>
