Release

Y24Q3

RELEASE NOTES

ASPECT4 Logistics

EG

Let's go further

ASPECT4 Logistics Release Y24Q3

New features and functionalities

Too many any attemps to build DB modules

When recreating all user spaces sometimes a lot attemps happens to recreate the same DB module if it is not possible for some reason. It is now optimzed so the same DB module will not be attempted recreated several times.

[A4-16228](#)

Option "Build DB Module" in application Files(9165) is changed, so it allways build the DB module whether it is required or not.

Corrections to startup parameters based on week numbers

It is now possible to do corrections to fields using week numbers when setting up job definitions (9176)

[A4-21719](#)

MESS() function in field controls does now support system messages

If a field control use MESS() function and the message number is > 9999 it now automatically use SYSTEM as program name. This correspond to the normal use of message numbers.

[A4-25976](#)

[3 issues](#)

Reported errors and inconveniences

Recording code 7 gives the wrong result

When using recording code 7 in setup for production feedback and the different outgoing items are in different processes the backflush gave a wrong result if more recordings were registered. The first one was correct.

[A4-23226](#)

Copying production orders

When copying a production order all order totals etc are now reset. Previous they were taken from the order that was used to copy from.

[A4-24454](#)

Icon for button not correct

When defining an icon for a button in IPE applications in system parameter Icons for applications (ICONAPP) or Icons for applications System defined(ICONAPS) the icon is now used for the button.

[A4-24711](#)

Calculate ABC-grouping of items (9211)

A4-24912

An error has been corrected so that the current cost price is now found correctly.

When secondary positioning fields are filled out, filtering filter out too many records

When values in secondary positioning fields are filled out, filtering considered secondary position fields as primary fields.

A4-25381

E.g in application Production Models(9121) with variants included and a value is in variant field. If a filter is made only records with variants higher than or equal to the positioned value was shown.

Open columns for alternative units in web client causes a dump

When fields for alternative units in order lines are open in the web client a dump could occur. It is now corrected but we still get an error message. In the release 24.3 this will be solved.

A4-25384

Error message in web client when changing value for alternative unit

If you in the web client changed the quantity for an order line in the list and the current item could not be calculated for all alternative units set up in the list, an error message appears and no changes happens. In the current framework alternative units cannot be open for list editing in lists and they are now set to not editable in the web client.

A4-25457

Field Help for PARMBRUGER is not delivered to customers

Field help for PARMBRUGER has not been delivered to customers. This will now be delivered. Also, added valid values in both English and Danish.

A4-25673

List not reset upon return from next level

Application dependent shortcuts(SHORTAPP) can be defined to reset list upon return. But sometimes it did not work when used in IPE-applications.

A4-25975

Returned trail text showed chinese letters

Use of text type P at Field Definition for getting trail text did sometimes return chines letters at the end when used in IPE-application

A4-26166

10 issues

Technical Notes

Prerequisites
• ASPECT4 Foundation release Y24Q3 need to be installed.
• ASPECT4 Logistics release Y24Q2 need to be installed.
The above conditions can be investigated via application 0361 'Display of system level information'.
Installation activities before loading
• Sign-on and receive the forwarded shipment via application 0590 'Install ASPECT4 software'.
• After receive sign-off.
• Before installation all automatic jobs shall be stopped (e.g. appl. 9272, 8262).
Installation activities after loading
• Sign-on and run application 0690 'Conversion runs' - need to be done in all companies.
• After converting sign-off.
• Any additional language packets received for ASPECT4 Logistics are installed.
• Any additional program shipments received with special software for ASPECT4 Logistics will be installed.
• The system is now ready for use with ASPECT4 Logistics Release Y24Q3.
